

Sound Symphony at Home Preparation Sheet

You will be sent a black box through the post.

This is full of sensory things you can play with, with your family.

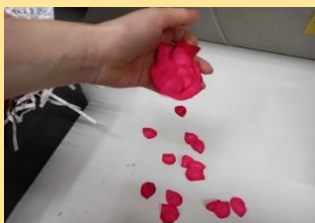

Once you have opened the box, you will find a gold envelope which tells you what to do. There is a link to the Sound Symphony Sensory film inside.

There is popcorn inside the box that you and your family can eat.

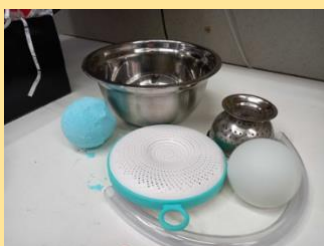

There is a sensory film you can watch together which shows people making sounds and music in different places.

You can throw scented rose petals like the people in the film do.

There are 3 sensory sound activities for you and your family to do together. Each one is in a different bag, with instructions of what to do.

You will use these objects to make a sound bath, where you make noises along to a soundtrack in your bath or sink.

You will use this object to listen to your favourite sounds in your home, garden, or street. Your family will film these sounds to make your own mini sensory film.

You will use these objects to make sound suits that you can wear and move around in to make sounds together.

You can keep the box and everything inside it.
