

Bunting Instructions

Materials

- Bunting template
- Printer
- Printer card or paper
- String
- Hole punch (if you don't have one you could find another way to make holes, or sellotape the bunting to the string)

Instructions

Use the bunting template to print as many 'flags' as you would like. The template includes 3 x A4 sized flags. We recommend you print this once for each metre of bunting you'd like to make.

Once printed, cut off the white section at the bottom of each flag to leave just the colourful flag shape.

Use the hole punch to make holes in the top left and top right corner of each flag.

Take your string, and thread it through the holes at the top of each flag.

Now you are ready to hang up your bunting!
